Chief Policy Officer
NASUCA 2019
Sunrun

The national leader in solar, storage, & home energy management.

23 states + DC & Puerto Rico.

Active in policy throughout country.

More than a quarter million customers nationwide.

On average, every 2.3 minutes a new system is installed.

Sunrun customers have saved over $300 million on electricity bills.

And produced 5 billion kWh of clean energy.

More than 5,000 Brightbox home batteries are providing back up power during outages.

The solar installer is the fastest growing job in America.

Sunrun alone has created more than 4,000 jobs & thousands more through our partners.
Home batteries Unlock New Value

Brightbox solves for market and customer needs:

- HI: Backup Power and Solar Self Supply
- CA: Backup Power, TOU Bill Management, Grid Services
- AZ: Backup Power, TOU Bill Management
- NY: Backup Power, Grid Services
- MA: Backup Power, Grid Services
- FL: Backup Power
- Puerto Rico: Backup Power

Sunrun’s Brightbox battery unlocks new value from renewables to meet customer needs and grid needs.

Esoteric market rulesCustomer value
Brightbox = Time Shifted Solar

Illustrative Residential Solar+Storage & Load Curve

Brightbox managing residential load shift in CA - managed for TOU, to minimize midday solar exports, and to flatten evening load - with flexibility for DR or other targeted shift, while maintaining charge for backup.
Resi solar + storage is rapidly scaling. Customers demand it.

- Residential storage market up 198% on average YOY between 2012-2018
- Market to **triple** in annual deployment between 2019-2020 and then again between 2020-2023. Residential storage accounts for a **quarter** of the market, reaching ~1 GWh annually by 2020 and ~2 GWh annually by 2022.

Continued rapid growth in residential storage means new planning, operational, and customer experience opportunities.

It also means rapidly scaling grid value potential.

Let’s harness this potential
# What do we do with all of these home batteries & solar?

## Wholesale: e.g., ISO-NE
- 20 MW bid won in 2019 Forward Capacity Auction
- Spread through number of New England states & ~5,000 homes
- First in nation
- Still providing backup power!

## Retail: e.g., BYOD
- Bring Your Own Device
- Utility program reducing wholesale or utility costs
- MA, VT, NH, NY
- Low risk, pay for performance
- Still providing backup power!

## Utility: e.g., Aggregation Contract
- Virtual Power Plant Procurement
- NWA - locational
- Peaker replacement
- Low-income/multifamily
- Still providing backup power!
Rising to the Challenge

Utility Business Model Undergoing Stress Test

- Increasing demand for DERs
- Puerto Rico - extreme example of broken utility model
- PG&E wildfires - climate threat
- Los Angeles gas peaker replacement
- Increasing awareness by customers and political leaders for sustainable climate solutions

Collaboration is necessary for a cleaner, more resilient, less expensive grid.
Customers will Drive the Transformation

Be the Guide

- Sunrun guarantees the output and maintenance throughout the life of the solar system.

- A+ BBB Rating

- Break down complexity with clear explanations.
  - SEIA disclosure

- Set clear expectations and deliver what we promise.
  - SEIA Code of Conduct
Thank You.
